

12-Month Rolling Period Log Sheet

Steps for calculating the 12-month rolling total:

- 1) For the first 12 months - track of the gallons used for each month.
- 2) At the end of 12 months - total the gallons used for the year.
- 3) After the first 12 months - subtract the first month from the total and add the next month.
- 4) Repeat step 3 for each additional month.
